Communication Architectures for Systems-on-Chip (Embedded Systems)

Communication Architectures for Systems-on-Chip (Embedded Systems)

A presentation of state-of-the-art approaches from an industrial applications perspective, **Communication Architectures for Systems-on-Chip** shows professionals, researchers, and students how to attack the problem of data communication in the manufacture of SoC architectures.

With its lucid illustration of current trends and research improving the performance, quality, and reliability of transactions, this is an essential reference for anyone dealing with communication mechanisms for embedded systems, systems-on-chip, and multiprocessor architectures—or trying to overcome existing limitations. Exploring architectures currently implemented in manufactured SoCs—and those being proposed—this book analyzes a wide range of applications, including:

- Well-established communication buses
- Less common networks-on-chip
- Modern technologies that include the use of carbon nanotubes (CNTs)
- Optical links used to speed up data transfer and boost both security and quality of service (QoS)

The book's contributors pay special attention to newer problems, including how to protect transactions of critical on-chip information (personal data, security keys, etc.) from an external attack. They examine mechanisms, revise communication protocols involved, and analyze overall impact on system performance.

From reader reviews:

Anthony Chan:

The book Communication Architectures for Systems-on-Chip (Embedded Systems) gives you the sense of being enjoy for your spare time. You can use to make your capable more increase. Book can to get your best friend when you getting stress or having big problem with the subject. If you can make reading through a book Communication Architectures for Systems-on-Chip (Embedded Systems) to become your habit, you can get far more advantages, like add your current capable, increase your knowledge about a number of or all subjects. You are able to know everything if you like wide open and read a guide Communication Architectures for Systems-on-Chip (Embedded Systems). Kinds of book are a lot of. It means that, science book or encyclopedia or other people. So , how do you think about this guide?

Marie Griffin:

Now a day folks who Living in the era wherever everything reachable by talk with the internet and the resources within it can be true or not demand people to be aware of each details they get. How people have to be smart in receiving any information nowadays? Of course the answer then is reading a book. Reading through a book can help men and women out of this uncertainty Information especially this Communication Architectures for Systems-on-Chip (Embedded Systems) book as this book offers you rich facts and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it everbody knows.

Erma Ward:

This book untitled Communication Architectures for Systems-on-Chip (Embedded Systems) to be one of several books in which best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit in it. You will easily to buy that book in the book store or you can order it through online. The publisher with this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Touch screen phone. So there is no reason to you to past this book from your list.

Stephanie Hopkins:

Playing with family in a very park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, and then why you don't try thing that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Communication Architectures for Systems-on-Chip (Embedded Systems), you are able to enjoy both. It is good combination right, you still need to miss it? What kind of hang-out type is it? Oh come on its mind hangout folks. What? Still don't buy it, oh come on its referred to as reading friends.
