Control System Components M.D. Desai

This book is specially designed for undergraduate and postgraduate students in electrical engineering for a course in control system components.

The subject of control system components is interdisciplinary, covering electrical, mechanical, electronic, hydraulic and pneumatic components. This book provides student-friendly coverage of numerous control system components such as cams, gears, gyroscopes, potentiometers, synchros dc and ac servomotors, stepper motors, tachometers, rotating amplifiers, magnetic amplifiers, servo amplifiers, modulators and demodulators, relays, hydraulic system components, and pneumatic control valves etc. The clear writing style of the book, enhanced by illustrative figures, makes it an ideal text for gaining an in-depth understanding of the subject of control system components.

KEY FEATURES

- Concise and clear presentation of concepts
- Descriptions of different concepts and processes are illustrated with more than 350 neatly drawn figures
- Chapter-end questions are designed to probe a student's grasp of the subject matter

From reader reviews:

Ruth Powers:

Information is provisions for individuals to get better life, information these days can get by anyone in everywhere. The information can be a understanding or any news even a concern. What people must be consider if those information which is in the former life are hard to be find than now could be taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you obtain the unstable resource then you get it as your main information you will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Control System Components as the daily resource information.

Patricia Spear:

Reading a book tends to be new life style in this era globalization. With reading you can get a lot of information that may give you benefit in your life. Together with book everyone in this world can easily share their idea. Guides can also inspire a lot of people. A great deal of author can inspire their particular reader with their story or their experience. Not only the storyplot that share in the guides. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors these days always try to improve their ability in writing, they also doing some study before they write on their book. One of them is this Control System Components.

Maxine Whitley:

Are you kind of hectic person, only have 10 as well as 15 minute in your time to upgrading your mind proficiency or thinking skill perhaps analytical thinking? Then you have problem with the book when compared with can satisfy your short time to read it because this time you only find reserve that need more time to be learn. Control System Components can be your answer because it can be read by you who have those short spare time problems.

Katrina Hering:

Some individuals said that they feel weary when they reading a book. They are directly felt it when they get a half elements of the book. You can choose the particular book Control System Components to make your reading is interesting. Your own skill of reading talent is developing when you just like reading. Try to choose basic book to make you enjoy to learn it and mingle the opinion about book and reading especially. It is to be 1st opinion for you to like to open up a book and go through it. Beside that the guide Control System Components can to be your new friend when you're feel alone and confuse in what must you're doing of the time.
