## **GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science** Marsha Alibrandi

Marsha Alibrandi takes us to the cutting edge of teaching social studies and environmental education using Geographic Information Systems (GIS). A computer application for urban planning, weather reporting, and geological and demographic studies, GIS has been increasingly employed by teachers to help students improve their geographical and critical thinking skills. Alibrandi presents an overview of this technology and examples of how it can transform your classroom.

Geography is everywhere and so is GIS!

GIS is just the right tool for students to explore, question, integrate, analyze, interpret, evaluate, and act on information. Alibrandi offers stories of teachers and students from the U.S. and Canada who have harnessed the power of GIS to conduct original research. Follow these students as they employ GIS to:

- conduct water quality testing where pollution and reduced flow had impacted local shellfish beds
- develop a profile of their city during the pre- and post-Civil Rights era by interviewing African American adults who had attended their school
- address community needs, including Food Bank distribution routes and site locations for child care facilities?
- solve problems in Canada, from transportation planning for the Olympics to mapping ethnic neighborhoods.

The companion interactive CD-ROM provides the GIS software, plus sample projects and activities for GIS integration, developed by the author and Shannon White, that are closely tied to the text.

Learn a new tool alongside your students. Introduce them to a technology that works equally well in other classes. Integrate their knowledge framework&mdahs;and connect their learning to greater local and global communities.

### **CD-ROM System Requirements**

Windows/PC

Pentium Processor (233 Mhz or higher)

Windows 95 (or higher)

64 MB RAM (more recommended)

SVGA Color Display (or better)

8x CD-ROM Drive (or faster)

Macintosh

PowerPC Processor

System 8 (or higher)

64 MB RAM (more recommended)

SVGA Color Display (or better)

8x CD-ROM Drive (or faster)

### **From reader reviews:**

#### **Paul Hinojosa:**

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite publication and reading a guide. Beside you can solve your short lived problem; you can add your knowledge by the guide entitled GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science. Try to face the book GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science as your friend. It means that it can to be your friend when you experience alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated for yourself. The book makes you more confidence because you can know every thing by the book. So , we need to make new experience as well as knowledge with this book.

#### **Arthur Elsberry:**

Your reading sixth sense will not betray anyone, why because this GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science e-book written by well-known writer who knows well how to make book that may be understand by anyone who all read the book. Written in good manner for you, leaking every ideas and producing skill only for eliminate your current hunger then you still hesitation GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science as good book not only by the cover but also with the content. This is one e-book that can break don't determine book by its handle, so do you still needing one more sixth sense to pick this particular!/? Oh come on your reading sixth sense already told you so why you have to listening to another sixth sense.

#### **Maria Vanness:**

Do you like reading a e-book? Confuse to looking for your best book? Or your book ended up being rare? Why so many query for the book? But any people feel that they enjoy to get reading. Some people likes studying, not only science book but in addition novel and GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science or others sources were given knowledge for you. After you know how the good a book, you feel wish to read more and more. Science guide was created for teacher as well as students especially. Those guides are helping them to put their knowledge. In some other case, beside science e-book, any other book likes GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science to make your spare time considerably more colorful. Many types of book like this one.

#### **Larry Swartz:**

What is your hobby? Have you heard which question when you got college students? We believe that that issue was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person similar to reading or as reading become their hobby. You should know that

reading is very important in addition to book as to be the issue. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You will find good news or update about something by book. Many kinds of books that can you decide to try be your object. One of them is GIS in the Classroom: Using Geographic Information Systems in Social Studies and Environmental Science.
