Mathematical Logic (Oxford Texts in Logic)

Ian Chiswell, Wilfrid Hodges

Mathematical Logic (Oxford Texts in Logic) Ian Chiswell, Wilfrid Hodges

Assuming no previous study in logic, this informal yet rigorous text covers the material of a standard undergraduate first course in mathematical logic, using natural deduction and leading up to the completeness theorem for first-order logic. At each stage of the text, the reader is given an intuition based on standard mathematical practice, which is subsequently developed with clean formal mathematics. Alongside the practical examples, readers learn what can and can't be calculated; for example the correctness of a derivation proving a given sequent can be tested mechanically, but there is no general mechanical test for the existence of a derivation proving the given sequent. The undecidability results are proved rigorously in an optional final chapter, assuming Matiyasevich's theorem characterising the computably enumerable relations. Rigorous proofs of the adequacy and completeness proofs of the relevant logics are provided, with careful attention to the languages involved. Optional sections discuss the classification of mathematical structures by first-order theories; the required theory of cardinality is developed from scratch. Throughout the book there are notes on historical aspects of the material, and connections with linguistics and computer science, and the discussion of syntax and semantics is influenced by modern linguistic approaches. Two basic themes in recent cognitive science studies of actual human reasoning are also introduced. Including extensive exercises and selected solutions, this text is ideal for students in logic, mathematics, philosophy, and computer science.

From reader reviews:

Marvin Seto:

Do you have favorite book? When you have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each publication has different aim as well as goal; it means that guide has different type. Some people experience enjoy to spend their a chance to read a book. They are reading whatever they get because their hobby is definitely reading a book. Why not the person who don't like reading a book? Sometime, individual feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will want this Mathematical Logic (Oxford Texts in Logic).

Rosalie Dietrich:

In this 21st centuries, people become competitive in each way. By being competitive right now, people have do something to make them survives, being in the middle of typically the crowded place and notice by simply surrounding. One thing that at times many people have underestimated the idea for a while is reading. Yep, by reading a e-book your ability to survive improve then having chance to stand up than other is high. For you who want to start reading the book, we give you this kind of Mathematical Logic (Oxford Texts in Logic) book as beginner and daily reading book. Why, because this book is usually more than just a book.

Santos Conrad:

That publication can make you to feel relax. This particular book Mathematical Logic (Oxford Texts in Logic) was colourful and of course has pictures around. As we know that book Mathematical Logic (Oxford Texts in Logic) has many kinds or variety. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore not at all of book are generally make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading that.

Theodore Rivas:

A lot of reserve has printed but it differs. You can get it by internet on social media. You can choose the very best book for you, science, witty, novel, or whatever through searching from it. It is identified as of book Mathematical Logic (Oxford Texts in Logic). You can add your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make you actually happier to read. It is most important that, you must aware about book. It can bring you from one location to other place.
