Mathematics in Nature: Modeling Patterns in the Natural World

John A. Adam

Mathematics in Nature: Modeling Patterns in the Natural World John A. Adam

From rainbows, river meanders, and shadows to spider webs, honeycombs, and the markings on animal coats, the visible world is full of patterns that can be described mathematically. Examining such readily observable phenomena, this book introduces readers to the beauty of nature as revealed by mathematics and the beauty of mathematics as revealed in nature.

Generously illustrated, written in an informal style, and replete with examples from everyday life, *Mathematics in Nature* is an excellent and undaunting introduction to the ideas and methods of mathematical modeling. It illustrates how mathematics can be used to formulate and solve puzzles observed in nature and to interpret the solutions. In the process, it teaches such topics as the art of estimation and the effects of scale, particularly what happens as things get bigger. Readers will develop an understanding of the symbiosis that exists between basic scientific principles and their mathematical expressions as well as a deeper appreciation for such natural phenomena as cloud formations, halos and glories, tree heights and leaf patterns, butterfly and moth wings, and even puddles and mud cracks.

Developed out of a university course, this book makes an ideal supplemental text for courses in applied mathematics and mathematical modeling. It will also appeal to mathematics educators and enthusiasts at all levels, and is designed so that it can be dipped into at leisure.

From reader reviews:

Ann Morgan:

This book untitled Mathematics in Nature: Modeling Patterns in the Natural World to be one of several books that best seller in this year, this is because when you read this guide you can get a lot of benefit into it. You will easily to buy this particular book in the book shop or you can order it by means of online. The publisher of the book sells the e-book too. It makes you easier to read this book, since you can read this book in your Cell phone. So there is no reason to your account to past this e-book from your list.

Leslie Padilla:

Spent a free time for you to be fun activity to complete! A lot of people spent their down time with their family, or their very own friends. Usually they undertaking activity like watching television, about to beach, or picnic from the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your free time/ holiday? Might be reading a book could be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to try look for book, may be the guide untitled Mathematics in Nature: Modeling Patterns in the Natural World can be fine book to read. May be it is usually best activity to you.

Timothy Duchene:

Guide is one of source of expertise. We can add our knowledge from it. Not only for students but in addition native or citizen want book to know the up-date information of year for you to year. As we know those ebooks have many advantages. Beside all of us add our knowledge, could also bring us to around the world. From the book Mathematics in Nature: Modeling Patterns in the Natural World we can consider more advantage. Don't one to be creative people? To be creative person must choose to read a book. Merely choose the best book that suited with your aim. Don't end up being doubt to change your life with that book Mathematics in Nature: Modeling Patterns in the Natural World. You can more desirable than now.

Orville Hightower:

Reading a book make you to get more knowledge from it. You can take knowledge and information from the book. Book is written or printed or outlined from each source which filled update of news. Within this modern era like now, many ways to get information are available for you actually. From media social like newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just seeking the Mathematics in Nature: Modeling Patterns in the Natural World when you essential it?
