Physics of Electric Propulsion (Dover Books on Physics)

Robert G. Jahn

Physics of Electric Propulsion (Dover Books on Physics) Robert G. Jahn

Geared toward advanced undergraduates and graduate students, this text systematically develops the concepts of electrical acceleration of gases for propulsion. Author Robert G. Jahn, Professor of Aerospace Sciences at Princeton University, starts his presentation with primary physical principles and concludes with realistic space thruster designs.

Part I consists of a survey of those aspects of electricity, magnetism, and ionized gas mechanics that underlie the physical mechanisms for gas acceleration. These topics constitute the main body of the text. Part II's broad division into the categories of electrothermal, electrostatic, and electromagnetic acceleration mechanisms conforms to the historical development of the field and offers conceptual organization for new students.

From reader reviews:

Michael Stanford:

What do you concentrate on book? It is just for students since they are still students or it for all people in the world, what best subject for that? Only you can be answered for that problem above. Every person has several personality and hobby for each and every other. Don't to be forced someone or something that they don't would like do that. You must know how great as well as important the book Physics of Electric Propulsion (Dover Books on Physics). All type of book can you see on many resources. You can look for the internet methods or other social media.

Amy Gutierrez:

The reserve untitled Physics of Electric Propulsion (Dover Books on Physics) is the guide that recommended to you to read. You can see the quality of the book content that will be shown to you actually. The language that writer use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, therefore the information that they share to you is absolutely accurate. You also could possibly get the e-book of Physics of Electric Propulsion (Dover Books on Physics) from the publisher to make you much more enjoy free time.

Jane Rippeon:

Would you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Aim to pick one book that you find out the inside because don't assess book by its include may doesn't work here is difficult job because you are scared that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer may be Physics of Electric Propulsion (Dover Books on Physics) why because the fantastic cover that make you consider with regards to the content will not disappoint you. The inside or content is definitely fantastic as the outside or cover. Your reading sixth sense will directly direct you to pick up this book.

Albert Hartley:

Is it anyone who having spare time in that case spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something new? This Physics of Electric Propulsion (Dover Books on Physics) can be the reply, oh how comes? A fresh book you know. You are and so out of date, spending your spare time by reading in this new era is common not a geek activity. So what these guides have than the others?
