**[2015 Reprint]** Roger Tory Peterson—the Renaissance man who taught Americans the joy of watching birds—also invented the modern field guide. His 1934 landmark *Field Guide to the Birds* was the first book designed to go outdoors and help people identify the elements of nature. This self-proclaimed “student of nature” combined spectacular writing with detailed illustrations to ultimately publish many other books, winning every possible award and medal for natural science, ornithology, and conservation.

*Birdwatcher* is a comprehensive, illustrated biography of Roger Tory Peterson—a hero in the conservation world—including interviews with friends, family, and protégés.
