Anti-Spam Techniques Based on Artificial Immune System Ying Tan

Email has become an indispensable communication tool in daily life. However, high volumes of spam waste resources, interfere with productivity, and present severe threats to computer system security and personal privacy. This book introduces research on anti-spam techniques based on the artificial immune system (AIS) to identify and filter spam. It provides a single source of all anti-spam models and algorithms based on the AIS that have been proposed by the author for the past decade in various journals and conferences.

Inspired by the biological immune system, the AIS is an adaptive system based on theoretical immunology and observed immune functions, principles, and models for problem solving. Among the variety of anti-spam techniques, the AIS has been highly effective and is becoming one of the most important methods to filter spam. The book also focuses on several key topics related to the AIS, including:

- Extraction methods inspired by various immune principles
- Construction approaches based on several concentration methods and models
- Classifiers based on immune danger theory
- The immune-based dynamic updating algorithm
- Implementing AIS-based spam filtering systems

The book also includes several experiments and comparisons with state-of-the-art anti-spam techniques to illustrate the excellent performance AIS-based anti-spam techniques.

Anti-Spam Techniques Based on Artificial Immune System gives practitioners, researchers, and academics a centralized source of detailed information on efficient models and algorithms of AIS-based anti-spam techniques. It also contains the most current information on the general achievements of anti-spam research and approaches, outlining strategies for designing and applying spam-filtering models.

From reader reviews:

Edward Tuttle:

This book untitled Anti-Spam Techniques Based on Artificial Immune System to be one of several books that will best seller in this year, honestly, that is because when you read this book you can get a lot of benefit into it. You will easily to buy this particular book in the book shop or you can order it by means of online. The publisher of this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Mobile phone. So there is no reason to you personally to past this book from your list.

Gregory Howard:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their free time with their family, or their particular friends. Usually they accomplishing activity like watching television, going to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you want to something different to fill your free time/ holiday? Might be reading a book may be option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of guide that you should read. If you want to try look for book, may be the publication untitled Anti-Spam Techniques Based on Artificial Immune System can be great book to read. May be it is usually best activity to you.

Johnnie Colby:

Do you like reading a publication? Confuse to looking for your selected book? Or your book seemed to be rare? Why so many issue for the book? But almost any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but in addition novel and Anti-Spam Techniques Based on Artificial Immune System or maybe others sources were given knowledge for you. After you know how the fantastic a book, you feel desire to read more and more. Science book was created for teacher as well as students especially. Those textbooks are helping them to increase their knowledge. In different case, beside science reserve, any other book likes Anti-Spam Techniques Based on Artificial Immune System to make your spare time considerably more colorful. Many types of book like this.

Marc Medina:

E-book is one of source of knowledge. We can add our knowledge from it. Not only for students but also native or citizen require book to know the change information of year to year. As we know those guides have many advantages. Beside all of us add our knowledge, could also bring us to around the world. By the book Anti-Spam Techniques Based on Artificial Immune System we can get more advantage. Don't that you be creative people? To become creative person must like to read a book. Only choose the best book that appropriate with your aim. Don't end up being doubt to change your life with this book Anti-Spam Techniques Based on Artificial Immune System. You can more appealing than now.
