Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 Anne Watson, Keith Jones, Dave Pratt

Big ideas in the mathematics curriculum for older school students, especially those that are hard to learn and hard to teach, are covered in this book. It will be a first port of call for research about teaching big ideas for students from 9-19 and also has implications for a wider range of students. These are the ideas that really matter, that students get stuck on, and that can be obstacles to future learning. It shows how students learn, why they sometimes get

things wrong, and the strengths and pitfalls of various teaching approaches. Contemporary high-profile topics like modelling are included. The authors are experienced teachers, researchers and mathematics educators, and many teachers and researchers have been involved in the thinking behind this book, funded by the Nuffield Foundation. An associated website, hosted by the Nuffield Foundation, summarises the key messages in the book and connects them to examples of classroom tasks that address important learning issues about particular mathematical ideas.

From reader reviews:

William Gannaway:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a e-book. Beside you can solve your condition; you can add your knowledge by the publication entitled Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19. Try to stumble through book Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 as your friend. It means that it can for being your friend when you truly feel alone and beside those of course make you smarter than ever. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know almost everything by the book. So , we need to make new experience and knowledge with this book.

Cindy Gross:

What do you think about book? It is just for students since they're still students or the item for all people in the world, the particular best subject for that? Merely you can be answered for that problem above. Every person has several personality and hobby for every single other. Don't to be pushed someone or something that they don't want do that. You must know how great as well as important the book Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19. All type of book would you see on many options. You can look for the internet methods or other social media.

David Dozier:

The e-book untitled Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 is the publication that recommended to you you just read. You can see the quality of the guide content that will be shown to you actually. The language that article author use to explained their ideas are easily to understand. The writer was did a lot of analysis when write the book, therefore the information that they share for you is absolutely accurate. You also might get the e-book of Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 from the publisher to make you more enjoy free time.

Pearl Moore:

A lot of e-book has printed but it is unique. You can get it by internet on social media. You can choose the most beneficial book for you, science, comedian, novel, or whatever by simply searching from it. It is known as of book Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19. You can include your knowledge by it. Without causing the printed book, it might add your knowledge and make you happier to read. It is most essential that, you must aware about reserve. It can bring you from one location to other place.
