100 Years of Subatomic Physics

Ernest M Henley, Stephen D Ellis

100 Years of Subatomic Physics Ernest M Henley, Stephen D Ellis

By year 1911 radioactivity had been discovered for over a decade, but its origin remained a mystery. Rutherford's discovery of the nucleus and the subsequent discovery of the neutron by Chadwick started the field of subatomic physics — a quest for understanding the fundamental constituents of matter.

This book reviews the important achievements in subatomic physics in the past century. The chapters are divided into two parts: nuclear physics and particle physics. Written by renowned authors who have made major developments in the field, this book provides the academics and researchers an essential overview of the present state of knowledge in nuclear and particle physics.

Contents:

• *Nuclear Physics:*

- Particle Physics, From Rutherford to the LHC (*S Weinberg*)
- The Early Years and Beyond (*E M Henley and A García*)
- 100 Years of Nuclear Mass Measurements and Models (*G T Garvey*)
- Symmetries and Dynamical Symmetries in Nuclei (*I Talmi*)
- Nuclear Fission (*R Vogt and J Randrup*)
- Parity- and Time-Reversal Tests in Nuclear Physics (*D Hertzog and M J Ramsey-Musolf*)
- High Energy Nuclear Physics: From Bear Mountain to the LHC (*L McLerran*)
- Chiral Symmetry in Subatomic Physics (*U-G Meißner*)
- Exotic Nuclei Far From the Stability Line (*K Hagino, I Tanihata and H Sagawa*)

• *Particle Physics:*

- A Short History of Colliders (*L Evans*)
- 4π -Detectors (*C Tully*)
- Large Underground Detectors for Proton Decay and Neutrino Physics (*K Scholberg*)
- Jets and QCD (*S D Ellis and D E Soper*)
- Diffractive Phenomena in High Energy Processes (*L Frankfurt and M Strikman*)
- Weak Interactions: From Current–Current to Standard Model and Beyond (*R N Mohapatra*)
- Neutrino Physics (*L Wolfenstein*)
- Introduction to Renormalization in Field Theory (*L-F Li*)
- Lattice Gauge Theory and the Origin of Mass (*A S Kronfeld*)
- String Theory and M-Theory (*J H Schwarz*)

Readership: Students, researchers and academics interested in nuclear and particle physics.

From reader reviews:

Christopher Riley:

This book untitled 100 Years of Subatomic Physics to be one of several books which best seller in this year, honestly, that is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this particular book in the book retail outlet or you can order it via online. The publisher in this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Mobile phone. So there is no reason for you to past this guide from your list.

Fred Polak:

Playing with family in a park, coming to see the sea world or hanging out with buddies is thing that usually you will have done when you have spare time, in that case why you don't try matter that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love 100 Years of Subatomic Physics, you may enjoy both. It is very good combination right, you still want to miss it? What kind of hang-out type is it? Oh seriously its mind hangout folks. What? Still don't obtain it, oh come on its identified as reading friends.

James Sweeney:

You will get this 100 Years of Subatomic Physics by look at the bookstore or Mall. Merely viewing or reviewing it can to be your solve problem if you get difficulties for the knowledge. Kinds of this book are various. Not only by simply written or printed and also can you enjoy this book by simply e-book. In the modern era similar to now, you just looking from your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose correct ways for you.

Suane Barnwell:

That guide can make you to feel relax. That book 100 Years of Subatomic Physics was colorful and of course has pictures around. As we know that book 100 Years of Subatomic Physics has many kinds or style. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore , not at all of book tend to be make you bored, any it offers you feel happy, fun and relax. Try to choose the best book to suit your needs and try to like reading this.
