Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) Helmut Traitler

Food products have always been designed, but usually not consciously. Even when design has been part of the process, it has often been restricted to considerations of packaging, logos, fonts and colors.

But now design is impacting more dramatically on the complex web that makes up our food supply, and beginning to make it better. Ways of thinking about design have broad applications and are becoming central to how companies compete. To succeed, food designers need to understand consumers and envision what they want, and to use technology and systems to show they can deliver what has been envisioned. They also need to understand organizations in order to make innovation happen in a corporation.

The authors of this book argue that design has been grossly underestimated in the food industry. The role of design in relation to technology of every kind (materials, mechanics, ingredients, conversion, transformation, etc.) is described, discussed, challenged and put into proper perspective. The authors deftly analyze and synthesize complex concepts, inspiring new ideas and practices through real-world examples. The second part of the book emphasizes the role of innovation and how the elements described and discussed in the first parts (design, technology, business) must join forces in order to drive valuable innovation in complex organizations such as large (and not so large) food companies.

Ultimately, this groundbreaking book champions the implementation of a design role in defining and executing business strategies and business processes. Not only are designers tremendously important to the present and future successes of food corporations, but they should play an active and decisive role at the executive board level of any food company that strives for greater success.

From reader reviews:

Corine Ramirez:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each book has different aim or even goal; it means that book has different type. Some people truly feel enjoy to spend their time to read a book. They are really reading whatever they take because their hobby is reading a book. Consider the person who don't like looking at a book? Sometime, man feel need book whenever they found difficult problem or even exercise. Well, probably you will require this Food Industry Design, Technology and Innovation (Institute of Food Technologists Series).

Mildred Smith:

Throughout other case, little men and women like to read book Food Industry Design, Technology and Innovation (Institute of Food Technologists Series). You can choose the best book if you want reading a book. As long as we know about how is important any book Food Industry Design, Technology and Innovation (Institute of Food Technologists Series). You can add information and of course you can around the world by just a book. Absolutely right, simply because from book you can realize everything! From your country right up until foreign or abroad you can be known. About simple factor until wonderful thing it is possible to know that. In this era, you can open a book or maybe searching by internet device. It is called e-book. You may use it when you feel weary to go to the library. Let's read.

David Shetler:

The book Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) can give more knowledge and also the precise product information about everything you want. So just why must we leave a very important thing like a book Food Industry Design, Technology and Innovation (Institute of Food Technologists Series)? Several of you have a different opinion about e-book. But one aim in which book can give many facts for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or data that you take for that, it is possible to give for each other; you are able to share all of these. Book Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) has simple shape but the truth is know: it has great and big function for you. You can search the enormous world by available and read a book. So it is very wonderful.

Janice Smith:

Hey guys, do you desires to finds a new book to study? May be the book with the title Food Industry Design, Technology and Innovation (Institute of Food Technologists Series) suitable to you? The particular book was written by popular writer in this era. Typically the book untitled Food Industry Design, Technology and Innovation (Institute of Food Technologists Series)is the main one of several books that will everyone read now. This particular book was inspired a number of people in the world. When you read this e-book you will

enter the new shape that you ever know just before. The author explained their plan in the simple way, consequently all of people can easily to be aware of the core of this guide. This book will give you a wide range of information about this world now. To help you to see the represented of the world within this book.
