Techniques for Image Processing and Classifications in Remote Sensing

Robert A. Schowengerdt

Techniques for Image Processing and Classifications in Remote Sensing Robert A. Schowengerdt Techniques for Image Processing and Classifications in Remote Sensing provides an introduction to the fundamentals of computer image processing and classification (commonly called ""pattern recognition"" in other applications). The book begins with a discussion of digital scanners and imagery, and two key mathematical concepts for image processing and classification-spatial filtering and statistical pattern recognition. This is followed by separate chapters on image processing and classification techniques that are widely used in the remote sensing community. The emphasis throughout is on techniques that assist in the analysis of images, not particular applications of these techniques. The book also has four appendixes, featuring a bibliography; an introduction to computer binary data representation and image data formats; a discussion of interactive image processing; and a selection of exam questions from the Image Processing Laboratory course at the University of Arizona.

This book is intended for use as either a primary source in an introductory image processing course or as a supplementary text in an intermediate-level remote sensing course. The academic level addressed is upper-division undergraduate or beginning graduate, and familiarity with calculus and basic vector and matrix concepts is assumed.

From reader reviews:

Summer McGaugh:

Typically the book Techniques for Image Processing and Classifications in Remote Sensing will bring you to the new experience of reading a new book. The author style to describe the idea is very unique. If you try to find new book to study, this book very appropriate to you. The book Techniques for Image Processing and Classifications in Remote Sensing is much recommended to you to learn. You can also get the e-book through the official web site, so you can more easily to read the book.

James McNally:

Reading a e-book tends to be new life style in this particular era globalization. With reading through you can get a lot of information which will give you benefit in your life. Using book everyone in this world can share their idea. Books can also inspire a lot of people. Lots of author can inspire their particular reader with their story or maybe their experience. Not only the storyline that share in the guides. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors nowadays always try to improve their skill in writing, they also doing some investigation before they write for their book. One of them is this Techniques for Image Processing and Classifications in Remote Sensing.

Michael Major:

Your reading sixth sense will not betray a person, why because this Techniques for Image Processing and Classifications in Remote Sensing guide written by well-known writer we are excited for well how to make book that may be understand by anyone who have read the book. Written throughout good manner for you, still dripping wet every ideas and creating skill only for eliminate your personal hunger then you still question Techniques for Image Processing and Classifications in Remote Sensing as good book not only by the cover but also from the content. This is one e-book that can break don't assess book by its deal with, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your reading through sixth sense already told you so why you have to listening to another sixth sense.

Barbra Walker:

Some individuals said that they feel uninterested when they reading a e-book. They are directly felt that when they get a half portions of the book. You can choose the particular book Techniques for Image Processing and Classifications in Remote Sensing to make your own personal reading is interesting. Your skill of reading ability is developing when you similar to reading. Try to choose simple book to make you enjoy to see it and mingle the impression about book and reading through especially. It is to be 1st opinion for you to like to wide open a book and learn it. Beside that the e-book Techniques for Image Processing and Classifications in Remote Sensing can to be your new friend when you're truly feel alone and confuse with what must you're doing of this time.
