## Fundamental Constructs in Mathematics Education (Researching Mathematics Learning)

*Fundamental Constructs in Mathematics Education* is a unique sourcebook crafted from classic texts, research papers and books in mathematics education. Linked together by the editors' narrative, the book provides a fascinating examination of, and insight into, key constructs in mathematics education and how they link together. The choice of constructs is based on (some of) the many constructs which have proved fruitful in research and which have informed choices made by teachers.

The book is divided into two parts: learning and teaching. The first part includes views about how people learn - from Plato to Dewey, as well as constructivism, activity theory and French didactiques. The second part includes extracts concerned with initiating, sustaining and bringing to a conclusion learners' work on mathematical tasks.

*Fundamental Constructs in Mathematics Education* provides access to a wide range of constructs in mathematics education and orients the reader towards important original sources.
