Microsoft's Internet Information Server 4.0 (included in the Windows NT 4.0 Option Pack) is emerging as the platform of choice for implementing corporate Intranets and Extranets, for Internet Service Providers, and for programmers developing complex Web-based applications. This practical, task-oriented guide provides detailed step-by-step instructions on virtually every aspect of installation, configuration, and system management, including how to administer servers, clients, and content developers. Task-based section titles (e.g. "Configuring WWW logging" and "Creating Virtual Servers") make it easier to access information as needed. And numerous screen shots further clarify and reinforce the text.
