Bio-Inspired Computing and Networking Yang Xiao

Seeking new methods to satisfy increasing communication demands, researchers continue to find inspiration from the complex systems found in nature. From ant-inspired allocation to a swarm algorithm derived from honeybees, **Bio-Inspired Computing and Networking** explains how the study of biological systems can significantly improve computing, networking, and robotics.

Containing contributions from leading researchers from around the world, the book investigates the fundamental aspects and applications of bio-inspired computing and networking. Presenting the latest advances in bio-inspired communication, computing, networking, clustering, optimization, and robotics, the book considers state-of-the-art approaches, novel technologies, and experimental studies, including bio-inspired:

- Optimization of dynamic NP-hard problems
- Top-down controller design for distributing a robot swarm among multiple tasks

- Self-organizing data and signals cellular systems
- Dynamic spectrum access in cognitive radio networks
- QoS-aware architecture for scalable, adaptive, and survivable network systems
- Locomotion control of the Hexapod Robot Gregor III

The book explores bio-inspired topology control and reconfiguration methods, as well as bio-inspired localization, synchronization, and mobility approaches. Providing wide-ranging coverage that includes past approaches, current challenges, and emerging concepts such as the evolution and self-healing of network architectures and protocols, this comprehensive reference provides you with the well-rounded understanding you need to continue the advancement of the development, design, and implementation of bio-inspired computing and networking.

From reader reviews:

Clifford Ranger:

Book is to be different for each grade. Book for children till adult are different content. As you may know that book is very important normally. The book Bio-Inspired Computing and Networking seemed to be making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The e-book Bio-Inspired Computing and Networking is not only giving you much more new information but also to get your friend when you feel bored. You can spend your personal spend time to read your publication. Try to make relationship with the book Bio-Inspired Computing and Networking. You never truly feel lose out for everything when you read some books.

Gina Gregg:

Information is provisions for folks to get better life, information these days can get by anyone on everywhere. The information can be a expertise or any news even restricted. What people must be consider when those information which is inside the former life are difficult to be find than now could be taking seriously which one works to believe or which one the actual resource are convinced. If you find the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen inside you if you take Bio-Inspired Computing and Networking as the daily resource information.

Marvis Byrnes:

This book untitled Bio-Inspired Computing and Networking to be one of several books that best seller in this year, this is because when you read this book you can get a lot of benefit onto it. You will easily to buy this particular book in the book retail outlet or you can order it by means of online. The publisher of the book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Touch screen phone. So there is no reason to you personally to past this e-book from your list.

Sean Martinez:

You can get this Bio-Inspired Computing and Networking by check out the bookstore or Mall. Simply viewing or reviewing it may to be your solve difficulty if you get difficulties for the knowledge. Kinds of this book are various. Not only simply by written or printed but also can you enjoy this book by simply e-book. In the modern era including now, you just looking from your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose appropriate ways for you.
