Methodology For Land And Housing Market Analysis

Methodology For Land And Housing Market Analysis

The aim of this book is to bring methods of land-market and land-price analysis to the foreground. It relates substantive research findings for land and urban development and blends these with a focus on research design and methodology. Its findings have relevance beyond the topics of housing and land: it broaches the whole question of how research design and general approach may lead to fundamentally different findings, different priorities, and different policy prescriptions and preoccupations. It is based on work done in the Third World, but is also relevant to studies of the industrialized world.
