A Life of Magic Chemistry: Autobiographical Reflections Including Post-Nobel Prize Years and the Methanol Economy George A. Olah

The autobiography of a Nobel Prize winner, this book tells us about George Olah's fascinating research into extremely strong superacids and how it yielded the common term "magic acids." Olah guides us through his long and remarkable journey, from Budapest to Cleveland to Los Angeles, with a stopover in Stockholm. This updated autobiography of a Nobel Prize winner George A. Olah:

- Chronicles the distinguished career of a chemist whose work in a broad range of chemistry areas, and most notably that in methane chemistry, led to technologies that impact the processing and utility of alternative fuels
- Is based on Olah's work on extremely strong superacids and how they yielded the common term, "magic acids"
- Details events since the publication of the first edition in 2000
- Inspires readers with details on Dr. Olah's successful recent research on methanol, intended to help provide a solution to "the oil problem"

From reader reviews:

Lela Koehn:

What do you with regards to book? It is not important to you? Or just adding material when you require something to explain what your own problem? How about your spare time? Or are you busy particular person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every individual has many questions above. They must answer that question mainly because just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular A Life of Magic Chemistry: Autobiographical Reflections Including Post-Nobel Prize Years and the Methanol Economy to read.

Leroy Torres:

Exactly why? Because this A Life of Magic Chemistry: Autobiographical Reflections Including Post-Nobel Prize Years and the Methanol Economy is an unordinary book that the inside of the e-book waiting for you to snap the idea but latter it will zap you with the secret it inside. Reading this book beside it was fantastic author who have write the book in such wonderful way makes the content interior easier to understand, entertaining approach but still convey the meaning entirely. So , it is good for you because of not hesitating having this ever again or you going to regret it. This amazing book will give you a lot of rewards than the other book possess such as help improving your ability and your critical thinking method. So , still want to delay having that book? If I were being you I will go to the e-book store hurriedly.

Arthur Poulsen:

Your reading 6th sense will not betray you, why because this A Life of Magic Chemistry: Autobiographical Reflections Including Post-Nobel Prize Years and the Methanol Economy reserve written by well-known writer who really knows well how to make book which might be understand by anyone who else read the book. Written within good manner for you, still dripping wet every ideas and writing skill only for eliminate your hunger then you still skepticism A Life of Magic Chemistry: Autobiographical Reflections Including Post-Nobel Prize Years and the Methanol Economy as good book not only by the cover but also from the content. This is one publication that can break don't evaluate book by its protect, so do you still needing another sixth sense to pick this!? Oh come on your reading through sixth sense already said so why you have to listening to one more sixth sense.

Evan Miller:

Are you kind of stressful person, only have 10 or 15 minute in your moment to upgrading your mind proficiency or thinking skill perhaps analytical thinking? Then you have problem with the book when compared with can satisfy your short period of time to read it because pretty much everything time you only find e-book that need more time to be study. A Life of Magic Chemistry: Autobiographical Reflections

Including Post-Nobel Prize Years and the Methanol Economy can be your answer because it can be read by a person who have those short extra time problems.
